- ☐ GOK
- ☐ Private
- ☐ CBO

Facility Level Tier

- ☐ Level 1
- ☐ Level 2
- ☐ Level 3
- ☐ Level 4
- ☐ Level 5
- ☐ Level 6

Assessment Date _____

Catchment Population _____

Interviewer(s)

- I. _____
- II. _____

Respondent(s)

- I. _____
- II. _____

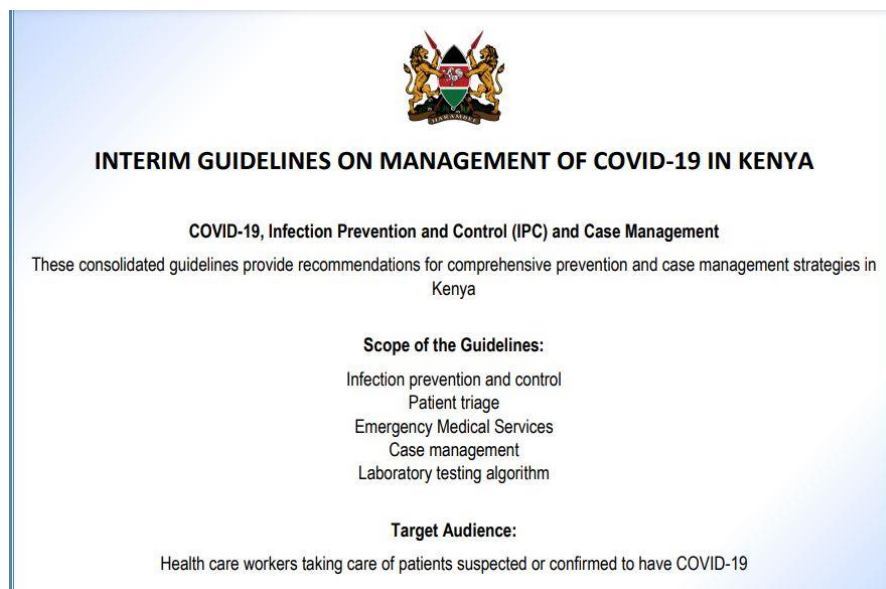

Introduction

The coronavirus disease 2019 (COVID-19) pandemic has changed how health care is delivered in Kenya and has affected the operations of healthcare facilities. Effects may include increases in patients seeking care for respiratory illness that could be COVID-19, deferring and delaying non-COVID-19 care, disruptions in supply chains, fluctuations in facilities' occupancy, absenteeism among staff because of illness or caregiving responsibilities, and increases in mental health concerns. Currently, no approved medications to treat COVID-19 or vaccines to prevent it are available.

Healthcare facilities need to provide care for all patients in the safest way possible for patients and healthcare personnel (HCP) and at the appropriate level, whether patients need home-based care, outpatient care, urgent care, emergency room care, inpatient care, or intensive care. This assessment seeks to find out measures put in place by health facilities in Kenya to operate effectively and safely during the COVID-19 pandemic.

Section 1: Infection prevention and control policies

a) The facility has COVID-19 prevention and control guidelines (Yes/No)

b) Facility management have reviewed the COVID-19 control guidelines and given guidance to the staff (Yes/No) - **relevant if (a) above is a Yes**

Section 2: Training of Health Care Providers (HCP) and Availability of supplies

HCP have been trained on the following

<i>Topic</i>	<i>Yes</i>	<i>No</i>
Signs and symptoms of COVID-19		
How to safely collect a specimen		
Correct use of personal protective equipment		
Facility has developed triage procedures including patient placement /fast tracking		
There is guideline on how/whom COVID-19 cases should be reported to		
Supplies required to manage emergency response are available (PPEs, Equipment...)		

Section 3: Patient Placement

Does this facility have an isolation room? (Yes/No)

The facility has a referral protocol to isolation centers? (Yes/No)

Name of the isolation center?

Section 4: Feedback and recommendations

In your own opinion what measures should be put in place by health facilities in Kenya to operate effectively and safely during the COVID-19 pandemic?
